<b>TABLE 1</b>			
<b>Coal Produced for Sale, Transfer, or Use</b> (Millions of Short Tons)			
Period	Surface Mines	Underground Mines	Total
Coal production <sup>A</sup> for entire State:			
Calendar Year			
CY 2007	0.015	24.141	24.156
CY 2008	0.108	26.240	26.348
CY 2009	0.048	24.666	24.714
<p>Coal production as shown in this table is the gross tonnage and includes coal produced during the calendar year (CY) for sale, transfer or use. The coal produced in each CY quarter is reported to OSM during the following quarter by each mining company on line 8 (a) of form OSM-1, 'Coal Reclamation Fee Report.' Gross tonnage does not provide for a moisture reduction. OSM verifies tonnage reported through routine auditing of mining companies. This production may vary from that reported by States or other sources due to varying methods of determining and reporting coal production.</p> <p><sup>A</sup> Provide production information for the latest three full calendar years to include the last full calendar year for which data is available.</p>

<b>Disturbed Acreage</b>		<b>Acres</b>		
Number of Acres Disturbed during this evaluation year		9		
Number of Acres Disturbed at the end of the evaluation year (cumulative)		3,014		
<p><sup>A</sup> Bonded acreage is considered to approximate and represent the number of acres disturbed by surface coal mining and reclamation operations.</p> <p><sup>B</sup> Bonded acres in this category are those that have not received a Phase III or other final bond release (State maintains jurisdiction).</p>				

Brief explanation of columns D & E. The States will enter the total acreage under each of the three phases (column C). The additional columns (D & E & E) will "break-out" the acreage among Phase II and/or Phase III. Bond release under Phase II can be a combination of Phase I and II acreage, and Phase III acreage can be a combination of Phase I, II, and III. See "Instructions for Completion of Specific Tables," Table 5 for example.
