

## PUBLIC NOTICE

Bull Mountains Mine No.1  
Federal Mining Plan Modification  
Environmental Assessment  
Unsigned Finding of No Significant Impact

The U.S. Department of the Interior, Office of Surface Mining Reclamation and Enforcement (OSMRE), Western Region Office, has prepared an Environmental Assessment (EA) and unsigned Finding of No Significant Impact (FONSI) for Signal Peak Energy, LLC's Bull Mountains Mine No. 1, Amendment 3 mining plan modification for Federal coal lease MTM 97988.

The Interior Department Assistant Secretary for Land and Minerals (ASLM), in accordance with the Mineral Leasing Act of 1920, originally approved Bull Mountains Mine No. 1, Amendment 3 mining plan modification for Federal coal lease MTM 97988 on February 24, 2015. On August 14, 2017, the District Court for the District of Montana identified deficiencies in OSMRE's analysis under the National Environmental Policy Act of 1969 (NEPA), vacated and set aside the 2015 Mining Plan Modification EA, and remanded the matter back to OSMRE for further action (see *Montana Environmental Information Center v. U.S. Office of Surface Mining et al.*, Case 9:15-cv-00106-DVM (D. Mont. Aug. 14, 2017)). The 2018 EA has been prepared to address the August 14, 2017 ruling and satisfy OSMRE's responsibilities under NEPA.

Signal Peak Energy, LLC (Signal Peak) owns and operates the Bull Mountains Mine No. 1. The mine is located in Musselshell and Yellowstone counties between the Musselshell and Yellowstone rivers, approximately 30 miles north of Billings and 20 miles southeast of Roundup, Montana.

The OSMRE is responsible for reviewing plans to conduct coal mining and reclamation operations on lands containing leased Federal coal. Pursuant to 30 CFR 746, the OSMRE must prepare and submit to the Secretary of the Interior a mining plan decision document recommending approval, disapproval, or approval with condition(s) of the proposed mining plan modification. OSMRE is announcing that the EA and an unsigned FONSI are available online and is requesting public comments on the documents.

The proposed mining plan modification would allow Signal Peak to continue underground coal mining, within the permit area, on a total of approximately 1,835 acres of Federal coal lands. In connection with mining this Federal coal, Signal Peak would also mine adjacent private and State coal. Mining would continue for a total of approximately 11.5 years and 109.7 million saleable tons of coal would be recovered. In addition to the mining of adjacent private and State coal, other actions that would be conducted in association with the proposed mining plan modification (i.e., connected actions) include facilities associated with rock disposal; construction of roads, boreholes and powerlines; installation of ventilation facilities; and other surface disturbances.

If no action is taken, Signal Peak would continue to mine approximately 2.5 years to recover the 22.9 million saleable tons of non-Federal coal remaining within the 140-acre permit area.

Interested persons may view the EA and the unsigned FONSI on the OSMRE website at:

<https://www.wrcc.osmre.gov/initiatives/bullMountainsMine.shtm>.

This notice initiates the public comment process on the 2018 EA and unsigned FONSI. To ensure consideration of your comments, we must receive your electronic or written comments by **April 11, 2018**. Comments may be submitted in writing or by e-mail. At the top of your letter or in the subject line of your e-mail message, please indicate that the comments are "Bull Mountains Mine No. 1 EA Comments."

- E-mail comments should be sent to: [osm-nepa-mt@osmre.gov](mailto:osm-nepa-mt@osmre.gov)
- Comments delivered by U.S. Postal Service Express Mail or by courier service must be delivered by **April 11, 2018** and should be sent to:
