Dear Interested Party,

The U.S. Department of the Interior, Office of Surface Mining Reclamation and Enforcement (OSMRE), Western Region Office, has prepared a supplemental environmental assessment (EA), to analyze environmental impacts of approving a Federal mining plan for future mining operations into the Falkirk Mining Company Coal Lease Tract NDM-107039 as part of its Falkirk Mine. The OSMRE prepared the supplemental EA, consistent with the National Environmental Policy Act of 1969. The supplemental EA is tiered to the descriptions and environmental analysis contained in the Bureau of Land Management's (BLM) Environmental Assessment for The Falkirk Mining Company Federal Coal Lease by Application for Tract NDM-107039 and is incorporated by reference into this supplemental EA in accordance with 40 CFR 46.135 and available to the public at: <https://eplanning.blm.gov/epl-front-office/projects/nepa/67410/105731/129311/DOI-BLM-MT-C030-2016-0020-EA.pdf>.

The Falkirk Mine is located in McLean County, near Underwood, North Dakota. The Federal Coal Lease Tract NDM-107039 is located in east ½ of section 10, Township 146 North, Range 82 West, McLean County. The BLM held a competitive sale for the NDM-107039 lease on October 17, 2017, which was awarded to The Falkirk Mining Company; the effective date the lease was issued is January 1, 2018. Once a coal mining operator obtains the rights of a Federal coal lease, two separate approvals are needed for a coal mine operator to conduct mining operations on Federal coal leases: 1) an approved Surface Mining Control and Reclamation Act (SMCRA) of 1977 permit approved by the regulatory authority, in this case the North Dakota Public Service Commission (PSC), and 2) an approved mining plan, or modification of a previously approved mining plan, by the Assistant Secretary for Land and Minerals Management (ASLM). The SMCRA mine permit approval by the North Dakota PSC provides the basis for the ASLM's decision on the mining plan or mining plan modification. The Falkirk Mine submitted an application to the North Dakota PSC on November 9, 2017. Subsequently, OSMRE determined that the addition to the Falkirk Mine requires a mining plan with ASLM approval for mining to occur on that Federal coal lease.

OSMRE is responsible for reviewing plans to conduct coal mining and reclamation operations on lands containing leased federal coal. Pursuant to 30 CFR 746, OSMRE must prepare and submit to the ASLM a decision document recommending approval, conditional approval or disapproval of the proposed mining plan modification. Approval of a mining plan would authorize surface mining of recoverable Federal coal in the lease of 2.2 million tons. Falkirk Mine anticipates production between 8.0 and 8.5 million tons annually. If the mining plan modification is approved, mining operations would extend approximately 7 months.

OSMRE is soliciting public comments on the supplemental EA and the unsigned Finding of No Significant Impact (FONSI). The supplemental EA and unsigned FONSI are available for review as of February 9, 2018. All comments must be received or postmarked by March 12, 2018, to be considered. Documents are available for review online at <https://www.wrcc.osmre.gov/initiatives/falkirkMine.shtm>.

Printed versions of the supplemental EA and unsigned FONSI are also available for review at the following locations:

Office of Surface Mining and Reclamation
1999 Broadway, Suite 3320
Denver, CO 80202

Between the hours of 8:00 AM and 4:00 PM Monday through Friday (Closed Saturday and Sunday)

You are invited to direct these comments by mail:

ATTN: OSMRE, Falkirk Mine Supplemental EA
C/O: Gretchen Pinkham
OSMRE WR
