

RADIO ANNOUNCEMENT – San Juan Mine Final Environmental Impact Statement

In accordance with the National Environmental Policy Act of 1969, the Office of Surface Mining Reclamation and Enforcement (OSMRE) has prepared a Final Environmental Impact Statement, or EIS, that analyzes the impacts of the San Juan Coal Company's proposed Deep Lease Extension at the existing underground San Juan Mine, located near Waterflow, New Mexico. The San Juan Mine supplies the San Juan Generating Station with coal and the proposed action would extend mining operations through 2033.

The Final EIS analyzes the direct, indirect and cumulative impacts of the proposed underground mining operations, alternatives, and the potential coal combustion related impacts at the San Juan Generating Station. OSMRE currently plans to issue a Record of Decision in April 2019.

You may view information about the proposed project and download the Final EIS on the OSMRE website.
